2. Chatting records.

23 September 2020

Arone Susau 23/09 13:05

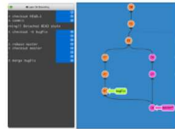

2

Hey team, when I was learning git I was given this tool a while back which I found super helpful and still refer back to sometimes today.

So if anyones interested, I'd highly recommend going through its tutorial 😊

<https://learngitbranching.js.org/>

Learn Git Branching

An interactive Git visualization tool to educate and challenge!

learngitbranching.js.org

23/09 13:06

thanks, probably something I need 😊

Todd Byrnes 23/09 13:07

Awesome will defs take a look at that

23/09 13:19

1

I've definitely heard this website from a course, the tutor asked us to use this, but I could not remember. 😊

Arone Susau 23/09 13:20

Hahaha yeah as with most educational material, it can get boring. Would recommend doing it in short bursts over time 😊

Arone Susau 08/10 11:49

Man have you merged in the login stuff yet

08/10 11:49

No, it is unfinished, but I can merge it now

It is in my dev branch

Arone Susau 08/10 11:50

ohhh will it break dev if its merged in now or is it only partially functional?

08/10 11:51

1

That's what I concerned, so I didn't merge it. However, it works on my laptop 😊

Arone Susau 08/10 11:51

1

also **Todd Tein** can you update clickup and move the cards that you've completed please 😊

Umm if you're confident **Man** merge it in, otherwise I can wait until you're happy. But I need that login stuff before I can start on frontend login

I'll work on OS in the meantime

08/10 11:54

Hmm, I am currently working on OS, let me create a PR, I think it won't break the code

Todd Byrnes Monday 17:02

Do we still want to meet today? I have nothing much to add currently. I know that we have our milestone submission on the weekend so we need to wrap things up by then.

Monday 17:03

I am working on other subject now 🤔

but I can attend meeting if someone starts it

I am confused about the Presentation. what is it

Tein Hwlar Phyu Monday 17:04

I'm confused about that too

Arone Susau Monday 17:04

Yeah sorry I forgot about the meeting, let me hop on quickly 😊 1

Todd Byrnes Monday 17:04

I did a presentation last sem on teams, essentially we screenshare the site and kind of walkthrough how a user would use the site. Unsure if it's the same as last sem though in terms of what they want

Monday 17:05

so, the submission of Presentation is a video.

Tein Hwlar Phyu Monday 17:05

Arone Susau Tuesday 10:58

Hey **Man**, I just realised that the skills api needs to be accessible without login because its displayed on the home page. Could you fix that up if possible or would you prefer I look into it? I don't mind 😊

Tuesday 10:59

You mean the get all skill api?

I ll do this now.

Arone Susau Tuesday 10:59

Yes thats the one, thank you

Tuesday 11:04

Done, but now the admin password stores without encrypt. So there is an issue that admin cannot login, I am working on it

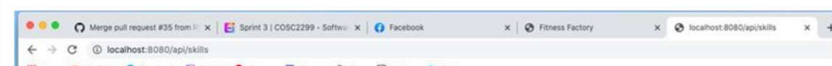

Arone Susau Tuesday 11:04

Okay awesome, I'll work on the frontend in the meantime

Arone Susau Tuesday 11:16

Man still looks like you need to login to view the skills page, unless im doing something wrong

Arone Susau Tuesday 17:23

I just realised that the schedules need to be public as well because they are used on the homepage in the booking process

Tuesday 17:24
ok

but then almost every api is public now

Arone Susau Tuesday 17:25

the enrollments aren't 😊

Todd Byrnes Tuesday 19:42

I have made a template for the Project Report (in the root folder of our files), that document is actually quite large T_T

1

active?

Arone Susau Wednesday 16:29

is this with or without the backend merge into your branch

because if you've already merged in the login stuff I can test that it all works 😊

Tein Hwlar Phyu Wednesday 16:30

We can't add employee from Admin 😞 So, don't know whether it's working or not

Todd Byrnes Wednesday 16:31

I think the backend needs to be launched, how do we launch the backend again locally? 😊

Arone Susau Wednesday 16:33

you'll need to fire up IntelliJ to run it 😊

Todd Byrnes Wednesday 16:35

welp

Tein Hwlar Phyu Wednesday 16:50

Can anyone pls review the pull request?

And Arone Susau if you don't mind, pls help us testing the Employee Dashboard

If it's working, we'll update on CSS.

Arone Susau Wednesday 17:10
