Acceptance Test #5	10
Acceptance Test #6	13

Acceptance Test #1

ID	U1.5
Purpose	Test the ability for a user to view their details of their account. (Back end integration)
Set Up	Access to the system is accessible.
Steps	1) User logs into their customer account
	2) User navigates to the “Dashboard” page
Expected Result	System reports the user’s details based on their user login information. It is retrieved from the back end and is shown on the dashboard page.

Figure 1: Screenshot showing the backend fetching information is displayed on the frontend.

Acceptance Test #2

ID	U1.6
Purpose	Tests that the user is able to enter new details to edit their user information.
Set Up	Customer is logged into the system
Steps	1) Navigates to the “Dashboard” page
	2) Clicks the “Edit Details” button
Expected Result	System displays a form where users are able to edit elements of their personal details.

Figure 2: This piece is not completely functional at this current time.

ID	U1.6
Purpose	Tests that the user is able to enter new details to edit their user information using invalid characters.
Set Up	Customer is logged into the system
Steps	1) Navigates to the “Dashboard” page
	2) Clicks the “Edit Details” button
	3) Enters invalid characters (eg. !@#\$%^&*)
Expected Result	System displays an error message detailing that the submitted characters were invalid and highlights the appropriate fields.

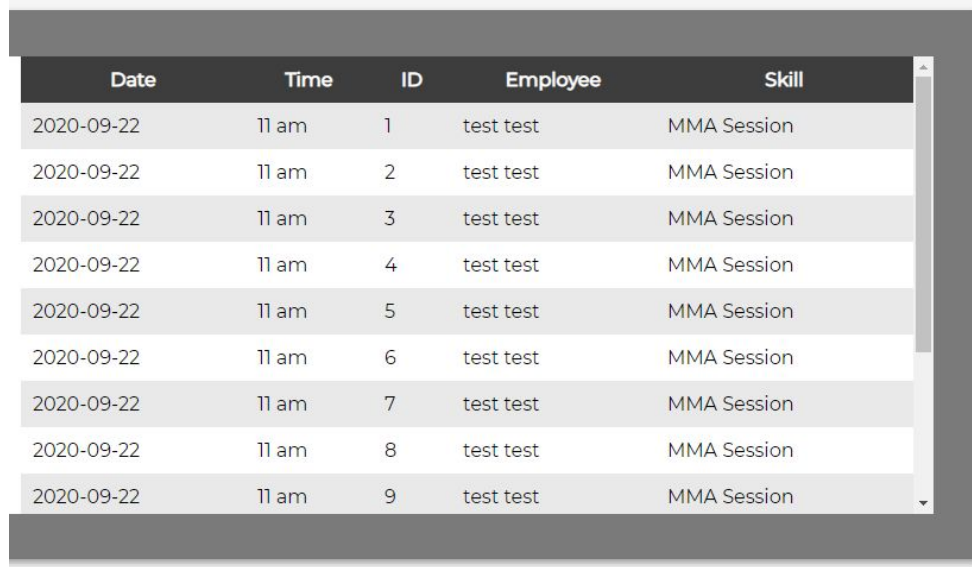

Figure 3: This piece is not completely functional at this current time.

ID	U1.6
Purpose	Tests that the user is able to enter new details to edit their user information and leaving blank fields for values that do not wish to be altered
Set Up	Customer is logged into the system
Steps	1) Navigates to the "Dashboard" page
	2) Clicks the "Edit Details" button
	3) Enters valid values in the given field(s)
	4) Makes certain fields blank to not be changed
Expected Result	System returns a success message that the user's details have been updated. The blank fields are unchanged.

Figure 4: This piece is not completely functional at this current time.

Acceptance Test #3

ID	U1.10
Purpose	Tests that user bookings are displayed in the dashboard
Set Up	Customer is logged into the system
Steps	1) Under “Services”, customer books into a class.
	2) Navigates to the “Dashboard” page
Expected Result	System displays a timetable of the classes that the user has booked into.

A screenshot of a user dashboard interface. It features a table with five columns: Date, Time, ID, Employee, and Skill. The table contains nine rows of booking data, all for the date 2020-09-22 at 11 am. Each row has a unique ID (1-9), the employee name 'test test', and the skill 'MMA Session'. The table is presented within a light gray frame that mimics a web browser window, with a vertical scrollbar on the right side.

Date	Time	ID	Employee	Skill
2020-09-22	11 am	1	test test	MMA Session
2020-09-22	11 am	2	test test	MMA Session
2020-09-22	11 am	3	test test	MMA Session
2020-09-22	11 am	4	test test	MMA Session
2020-09-22	11 am	5	test test	MMA Session
2020-09-22	11 am	6	test test	MMA Session
2020-09-22	11 am	7	test test	MMA Session
2020-09-22	11 am	8	test test	MMA Session
2020-09-22	11 am	9	test test	MMA Session

Figure 5: Details of user bookings are shown on their dashboard upon access.

ID	U1.10
Purpose	Tests that user bookings from the past can be viewed
Set Up	Customer is logged into the system
Steps	1) Navigates to the “Dashboard” page
	2) Clicks the “Back” button on the timetable
Expected Result	System displays a timetable of the classes that the user has booked into over the past few weeks.

Figure 6: Details of user bookings are shown on their dashboard upon access.

Acceptance Test #4

ID	A1.2 Admin create employee
Purpose	Test if Admin could create employee
Set Up	Admin on the admin page
Steps	1) Admin click the Create Employee Tab
	2) Admin input details of Employee
	3) Admin click the Create button
Expected Result	An employee is created
Actual Result	An employee is created

Step 1: Admin Page

Welcome Admin Foo

Create Customer		Create Employee		Create Skill		Create Schedule		Create Booking	
Customers		Employees		Skills		Schedules		Bookings	
id	userName	password	created_At	updated_At		fname		lname	
1	worker1	123	2020-09-19			test		test	

Step 2: Input Detail

Create Employee

employeeTest1

...

fname

lname

Cancel

Create

Step 3: Result

Welcome Admin Foo

Create Customer		Create Employee		Create Skill		Create Schedule		Create Booking	
Customers		Employees		Skills		Schedules		Bookings	
id	userName	password	created_At	updated_At		fname	lname		
1	worker1	123	2020-09-19			test	test		
4	employeeTest1	123	2020-09-21			fname	lname		

Acceptance Test #5

ID	A1.4 Admin edit employee
Purpose	Test if Admin could edit employee
Set Up	Admin on the admin page
Steps	1. Admin click the Employee Tab 2. Admin click the Employee he wants to edit 3. Admin click the edit button 4. Admin input the detail and click confirm button
Expected Result	An employee was edited
Actual Result	An employee was edited

Step 1: Admin Page
